HOP ON!

The Official 11 Tips to Get the Most Out of Motorbunny

GOT ADDITIONAL TIPS?

Help a bunny out and let us know!

support@motorbunny.com

Congratulations on joining the Motorbunny community!

Motorbunny was created to help you get as much satisfaction in your sexual life as possible. Our “goes-to-11” philosophy is a cheeky way of expressing how strongly we feel that you should never stop experimenting, exploring, playing, and relishing life.

We’re not here to tell you what to do, but the following 11 tips can help you to learn more about the Motorbunny experience and how it can take you beyond what you’ve ever thought possible.

TIP 1

Use the restroom before hopping on to make getting off a little easier.

TIP 2

Set-up for success.

Put the Motorbunny on a firm surface like floor or a bed (but not a waterbed). If on the floor, we suggest placing the Motorbunny on a soft blanket or towels to give your knees a break. This will also help to dampen vibration. Always have the controls near your hands or in the hands of your partner. It’s also helpful to set up next to a couch or bed so you have something to help you to balance.

TIP 3

“Hop on” before you get started.

Make sure your Motorbunny controls are set to zero before seating yourself. Start rotation slowly and adjust yourself to a comfortable position, then add vibration when you’re ready. Always use plenty of water-soluble lubricant! They’ll make more, we promise.

TIP 4

Start small.

We recommend that first-time users begin with the flat clitoral attachment. This lets you find a good, comfortable position before getting into attachments designed for penetration.

Once you've tried the attachments in the Motorbunny Starter Kit, check out a wider range of experiences with premium silicone attachment options at motorbunny.com.

TIP 5

Rise up!

Two attachment risers are included in the Motorbunny Starter Kit. These attach to the Motorbunny platform beneath an attachment to increase contact with your clitoris. See which riser is right for you!

TIP 6

You go, cowgirl.

The most common Motorbunny position is shown here. Straddle Motorbunny with the controls in front of you, knees down and feet behind you. You can also try to put your knees up with your feet flat on the floor.

TIP 7

Gotta get up to get down.

Some users prefer to raise their Motorbunny so their feet will be down as shown in here. It's important that whatever you put the Motorbunny on is very sturdy and can hold your weight. Note that the Bunnyrest stool included in the Motorbunny Starter Kit is not designed for the Motorbunny to be used on top of it.

TIP 8

Find your groove.

Leaning forward increases contact with your clitoris. Leaning back will increase pressure on your G spot. Play with the controls and your body position to find the perfect combination for you.

TIP 9

Party of two.

The Bunnyrest is also ideal for a partner to sit on while adding to your experience.

TIP 10 **Take this lying down.**

On a bed, some users choose to lie down fully, and use their heels to hold the Motorbunny in place.

TIP 11

Never stop experimenting! Even if you find a position and settings that you love, there's always a chance something even more mind-blowing is around the corner. The wide range of attachments, positions and settings of Motorbunny provide endless combinations for unique, fun experiences.

Some people like "The Safe Driver," with Buzz at 10 and Twirl at 2.

Some enjoy the "Answer to the Ultimate Question of Life, the Universe, and Everything," at 4 and 2, of course.

"7-11," we've heard is quite convenient.

Hop on, turn it up, lean in or back or whatever feels good. Just never stop experimenting!
